

POTENTIALITY OF A TEAM IN A NEW CONTEXT

I started my work at Bisnode 11 years ago with a very small team of 11 people and a critical financial situation. Today there are 120 of us in Slovenia and 100 more in the former Yugoslavian markets (Croatia, Serbia, Bosnia and Herzegovina), we have grown 7 times in the last 7 years and we are the top performing company in our multinational group.

What has this to do with Slovenia? A lot. I have just put in a new context the great potentiality of a team.

What assets I could count on? Creativity, practical sense, hard working mentality, flexibility (to follow instructions). What I had to work on? Capacity to accept responsibility, "think -big" attitude, process thinking, structured operating model, wish to emerge and be excellent.

Today, what makes us better is the quality of our services, what makes us different is passion. A sincere passion for business: for our business and for our business environment.
